

Your HTC Smart Quick start guide

htc
quietly brilliant

Before you do anything else, please read this

Charge the battery

The battery in your phone hasn't been charged yet. While your phone is charging, it's important that you do not remove the battery pack. Doing so can damage your phone. Also, please don't try to take your phone apart. (If you do, it may invalidate your warranty.)

Choose a rate plan wisely

Your phone can use up a lot of Internet bandwidth really quickly. Before you use your phone, we strongly recommend that you talk to your mobile operator about data rates. If you're on a standard data plan, the costs could really add up. Switching to a flat-rate plan could be more cost effective or suitable.

Know about privacy laws

Some countries have strict laws about how and when you can record phone conversations. For example, you may need to tell the person you're speaking to before you start recording. It's a good idea to find out what the laws are where you live before you use your phone's recording feature.

And finally, a few important words from our legal team (LIMITATION OF DAMAGES)

To the maximum extent permitted by applicable law, in no event shall HTC or its affiliates be liable to you, any user, or third party for any indirect, special, consequential, incidental or punitive damages of any kind, arising in contract, tort, or otherwise, including, but not limited to, injury, loss of revenue, loss of goodwill, loss of business opportunity, loss of data, and/or loss of profits, regardless of the foreseeability thereof or whether HTC or its affiliates have been advised of the possibility of such damages. And in no event shall the total liability of HTC or its affiliates exceed the amount received from you, regardless of the legal theory under which the cause of action is brought. The foregoing does not affect any statutory rights which may not be disclaimed.

This quick start guide will help you get started with your phone. In this guide, we use the following symbols to indicate important or useful information:

1. What's in the box

Here's what you should find inside the box:

- HTC Smart
- Battery (preinstalled)
- USB cable
- Power adapter
- 3.5mm stereo headset
- This quick start guide

2. Get to know your phone

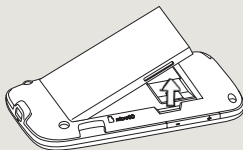

3. Before you turn on your phone

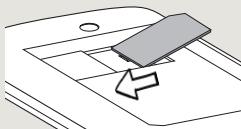

1 Take the back cover off

Put your fingertip into the narrow opening at the top of the phone. Lift off the top left side of the back cover, and then push it to the right to remove the back cover completely.

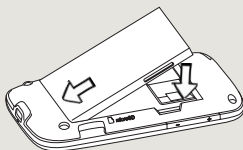

2 Take the battery out

Put your fingertip into the small groove located at the right side of the battery compartment, and then lift the battery out.

3 Put the SIM card in

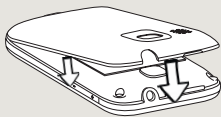

When inserting the SIM card, make sure its cut-off corner is facing out and the gold chip is facing down. Slide the SIM card all the way into the SIM card slot.

4 Put the battery back in

 Peel off the thin film on the back of the battery first.

Line up the battery's copper contacts with the connectors inside the battery compartment. Gently push the battery into place.

5 Put the back cover on

Line up the bottom of the back cover with the two small openings at the bottom of the phone, and then gently push the back cover down. When you hear a click, it's secure.

6 Charge the battery

Connect the USB connector of the power adapter to the phone, and then plug in the power adapter to an electrical outlet.

It will take about three hours for the battery to be fully charged.

After installing the SIM card and battery and charging the battery, you are now ready to turn your phone on for the first time. Press and hold the END CALL/POWER button to turn it on.

Read on and start exploring what you can do with your phone.

4. Get started

The first time you turn your phone on, you'll get to choose some basic phone settings and set up your online accounts such as Gmail™/Google Mail™, Facebook™, and Twitter™.

You'll need an Internet connection to log in to your online accounts.

1. Choose your language, and then tap **Next**.
2. Decide whether you want your current location to be detected. Tap **Agree** to use a third-party location service. If you'd rather not, tap **Disagree**.

Location service helps determine your current location when you're using applications like Weather. You can ask your mobile operator to find out whether there are data charges when you turn this feature on.

3. Set up your email accounts, or tap **Skip** to set them up at a later time.

To set up an email account, tap the type of account or tap **Other**. On the subsequent screens, tap each item on the screen first, such as **Email address** and **Password**, so you can enter your account information.

4. When you are done setting up an email account, tap **Save**.
5. Tap **New account** and repeat steps 3 and 4 to set up another email account, or tap **Next** to go to the next step.
6. Set up social network accounts such as Facebook and Twitter, or tap **Skip** to set them up at a later time.

To set up, choose a social network account, enter your username or email address and password, and then tap **Login**. After login is successful, set up another account, or tap **Next** to go to the next step.

7. Set weather and location information on your phone. Tap the On/Off buttons to turn automatic updates on or off, and then tap **Next**.

This service may result in additional charges from your mobile provider. You can turn off automatic updates at any time in **Settings > Data services**.

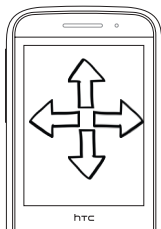

8. Your phone sets the current time and date. This may be network-provided or through location service (if enabled).

If these settings can't be auto-detected, manually set the current time, date, and time zone, and then tap **Done**.

Finger moves

Use these easy finger gestures to move around your phone:

- **Tap**. Simply touch an onscreen item with your finger.
- **Double-tap**. Quickly touch an item or area twice.
- **Slide or swipe**. Move your finger vertically or horizontally across the screen.

- **Press and hold**. Touch an area or item without lifting your finger immediately.
- **Drag**. Press and hold an item, and then move your finger with some pressure. Do not release it until you reach your target position.

Onscreen keyboard basics

Shift. Tap to enter an uppercase letter. Tap twice to turn Caps lock on.

Enter. Tap to create a new line. If multiple lines are not allowed, tapping this key closes the onscreen keyboard.

Delete. Tap to erase the previous character.

Orientation. Tap to switch between Phone Keypad (displayed only in portrait orientation) and QWERTY (displayed only in landscape orientation).

Close. Tap when you're done typing.

Input mode. Tap to turn word prediction (XT9) on or off. This key is available only in Phone Keypad.

Numbers and symbols. Tap to see more numbers and symbols. This key is available only in Phone Keypad.

Navigation pad. Tap to display and use onscreen arrow keys for directional control. This key is available only in Phone Keypad.

Tap to see more numbers and symbols. Press and hold to display and use onscreen arrow keys. This key is available in QWERTY or if you have selected multiple keyboard languages.

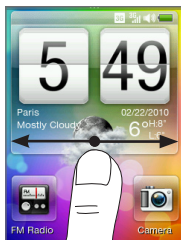

Language key. Tap to switch to another language. This key is available only if you have selected multiple keyboard languages.

5. Experience HTC Sense

Discover HTC Sense™ on your phone, an intuitive and seamless experience built upon three fundamental principles — make it mine, stay close, and discover the unexpected.

Mobile essentials at a glance

All essential features that you need from your phone are right upfront on the Home screen. You don't have to jump from one application to another. Simply slide your finger left and right to see your new messages, check weather forecasts, listen to music, and more.

Press and hold the BACK/HOME button to go straight to the main Home screen.

Add shortcuts for quick access to applications. To add application shortcuts, slide your finger up on the main Home screen, tap an empty slot, and then select a favorite application to add.

On the main Home screen, slide up to access available slots for adding shortcuts.

Different Scenes for work and play

Your phone becomes multiple phones in one when you use scenes. Scenes are personalized Home screen configurations that you can quickly apply to your phone to suit your mood - be it for work or play. You can even create your own scene to fit your life style and daily needs.

To choose a preset scene, press MENU while on the main Home screen, tap **Scenes**, and then tap a scene you want to use. Press and hold the BACK/HOME button to return to the Home screen, and then slide left or right to explore the selected scene.

You can customize the scene you selected and save it as a new scene. Take a look at the complete user guide on our website, www.htc.com/support, to see how it's done.

All about people

Interactions such as phone calls and messages are neatly organized by people, not by applications. When you open a friend's contact card, it gives you one-touch access to all of his or her contact details, messages, email, Facebook updates, and call logs.

 Katie Jackson	
Mobile	61425286631
Send message	
Email1:	katiejackson.kj@gmail.com
Messages	2
Email	1
Call history	2

Sending messages to several people is easier, too. When you create groups, you can easily send a text or email message to all group members at once.

Smart Dial

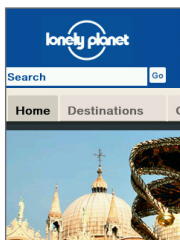

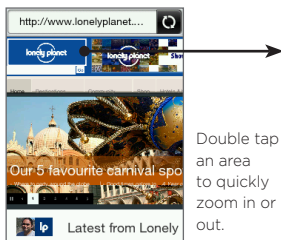

Your phone lets you dial by name or by number.

Press the CALL button, enter the first few characters or digits of a contact's name or phone number, and then tap a contact from the filtered list.

Smart web experience

There is a smart zoom, which enlarges and reflows the text on web pages for your reading pleasure with just a double-tap on the screen.

You can also switch the web browser to landscape mode so you can get a better view while browsing web pages.

Friend Stream

Find out what everyone is saying in Facebook and Twitter. With **Friend Stream**, you can update your status, catch the latest buzz in Facebook, and follow tweets on Twitter.

6. Add your contacts

You can create new contacts on your phone or import existing ones from your SIM card.

When you open the People application for the first time, you will be asked whether to import SIM card contacts to your phone. Tap **OK** to import.

Adding a new contact on your phone

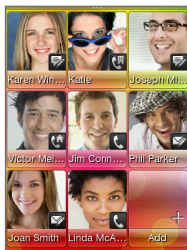

1. Press and hold the **BACK/HOME** button to return to the Home screen, and then slide to the People screen.
2. Press **MENU**, and then tap **All** to open the People application.
3. Press **MENU**, and then tap **New contact**.
4. Tap **Phone** to create a new contact on your phone.
5. Tap **Add name**, enter the contact's first and last name, and then tap **OK**.
6. Tap **Add photo**, select an album, and then choose a photo for the contact. Crop the photo as needed, and then tap **Done**.
7. Tap **Add phone**. Select a phone number type, and then enter the contact's phone number.
8. Fill in other details, such as the email address, postal address, and ringtone to use for the contact. When contact details are complete, tap **OK**.

Accessing your SIM card contacts

1. Press and hold the **BACK/HOME** button to return to the Home screen, and then slide to the People screen.
2. Press **MENU**, and then tap **All** to open the People application.
3. Press **MENU**, and then tap **SIM manager**.

Adding favorite contacts to the People screen

1. Press and hold the BACK/HOME button to return to the Home screen, and then slide to the People screen.
2. Tap an empty slot.
3. Select a contact.
4. On the Default action screen, choose what contact method to use for the favorite contact (phone call, text message, or email).

7. Access applications on your phone

See what applications your phone has in store for you. From the main Home screen, press the BACK/HOME button to open the All Programs panel and check out what applications you can use. Slide left to scroll the panel sideways and access more applications.

8. Get your messages across

Keep in touch with important people in your life.

Sending a text message

1. From the main Home screen, slide to the Messages screen.
2. Press MENU, and then tap **New** to create a new text message.
3. Tap the text box that says "Tap to add recipient," and then enter a contact name or mobile phone number.
4. Tap the Message area, and then enter your message.
5. Tap **Send**.

Sending an email

1. From the main Home screen, press the BACK/HOME button to open the All Programs panel.
2. Tap **Mail**.
3. If you have not set up your email account, tap the type of account or tap **Other**. On the subsequent screens, enter your account details, and then tap **Save**.
4. In your inbox, press MENU, and then tap **New**.
5. Tap the text box that says "Tap to add recipient," and then enter a contact name or email address.
6. Enter a subject and your message.
7. Tap **Send**.

9. Surf the web

It's simple. When you turn your phone on for the first time (with the SIM card inserted), it should connect automatically to your mobile operator's data service. You can start browsing the web straight away.

Do not change the connection settings as this may cause services to stop working. If you really need to change some settings, you should contact your mobile operator.

1. On the main Home screen, tap the **Internet** icon to open your phone's web browser.
2. Tap the address bar, and then enter a web address.

As you enter the first few characters, popular web addresses are then listed. You can tap an address from the list or continue entering a web address.

10. Capture photos and videos

When something amazing happens right before your eyes, have your phone camera ready to instantly capture snapshots or record it on video.

1. Press the CAPTURE button to open the camera.
2. Tap the Capture mode switch () to set the camera to **Photo** or **Video** mode.
3. Point the camera at your subject.
4. Tap the onscreen Flashlight button to choose a flash mode: **Auto** (available only in Photo mode), **On**, or **Off**.

You can press MENU to access more camera controls and settings.

5. Press the CAPTURE button to take a photo or start recording video.

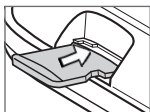

If you are in Video mode, press the CAPTURE button again to stop capturing.

11. Get files into your phone

Bring your songs, photos, and videos wherever you go. Insert a microSD™ card into your phone so you can copy these files and view or play them on your phone.

Inserting a microSD card

1. Turn off your phone, and then remove the back cover.
2. Slide the microSD card into the microSD slot, and then push it in until you hear a click.

3. Put the back cover on, and then press and hold the **END CALL/POWER** button to power on.

Connecting your phone to a computer

1. Connect your phone and computer with the USB cable that came in the box.
2. On the USB connected screen, tap **Mount SD card**, and then tap **OK**.

When the storage card is mounted, you won't be able to open its files using your phone.

3. On your computer, the connected phone is recognized as a removable disk (just like any USB drive). Open this removable disk so you can see what's inside the microSD card.
4. Copy your files from your computer to the microSD card.
5. After copying, unmount the removable disk (that is, the connected phone) as required by your computer's operating system to safely remove your phone.

12. Sync your phone with your computer

You can use HTC Sync™ to sync Outlook contacts and calendar or Outlook Express contacts between your computer and your phone.

Visit our website, www.htc.com/support, to download and install HTC Sync to your computer.

13.Factory resetting

Need to start over? If you're passing your phone on to someone else or just want a fresh start, you can factory reset your phone. It's not a step to be taken lightly.

Factory resetting your phone will delete all your data. It returns the phone to the state it was in before the first time you turned it on.

Be sure to back up data (contacts and files) that you want to keep before you factory reset your phone.

Resetting the phone through settings

1. From the main Home screen, press MENU, and then tap **Settings > Security > Factory reset**.
2. Enter "1234", and then tap **OK** to start the factory reset.

Resetting the phone while it's turned off

1. Press and hold the VOLUME UP, VOLUME DOWN and END CALL/POWER buttons.
2. Press the VOLUME DOWN button to start the factory reset, or press any other button to cancel it.
3. When the factory reset process is complete, press the VOLUME DOWN button to restart your phone and begin anew.

14.Troubleshooting tips

If you ever have any problem using your phone, here are some things you can do to set things right again:

- If your phone becomes unresponsive, remove the battery, wait for three seconds, and then reinsert the battery. Turn the phone back on.
- Check for additional updates and useful tips on our support website: www.htc.com/support.

- If your phone has a persistent problem that is not solved by turning the phone on or off, back up important data (contacts and files) and factory reset the phone.
